

Plan 1

The timeless charm and character of the classic Colonial New England theme is enhanced by state-of-the-art architectural refinements and an appreciation of the homes' coastal Southern California setting. While the massive used-brick fireplace and hearth in the living room provide a warm centerpiece to this sprawling residence, the adjacent dining room is a slightly subdued, more formal gathering place. The theme is sumptuously concluded in the master bedroom suite, with its handsome fireplace and natural oak mantel.
